
All-negative plate (additive)
All-positive plate (relative)
Gas plates (relative)
Gas plates (additive, for comparison)
held-out skill vs. control median
skill on the control wells (in-sample)
GP, sweep figure (per-layout mean)
GP (this method)
inverse-distance
row + column
nearest control
ceiling estimate 0.46 (not a bound)
ceiling estimate 0.39 (not a bound)
ceiling estimate 0.70 (not a bound)
ceiling estimate 0.75 (not a bound)
sweep stops at 40
row + column: min -1.1, off-scale
nearest and inverse-distance overlap at 1:
they replay the control values exactly
number of control wells
